Swisso Locker Systems

New customizable and modular locker systems

Swiss Instruments is happy to introduce our new range of customizable off the shelf steel locker systems. Our lockers are designed to provide exceptional strength and durability with quality materials and manufacturing.

Locker Build Quality

Our locker frames are resistance welded on all four corners to create a solid structure. The bodies are manufactured from 24 ga prime grade cold rolled steel and the doors are all welded double pan construction. To further enhance strength assembly is completed with pop riveting.

Locker Interior

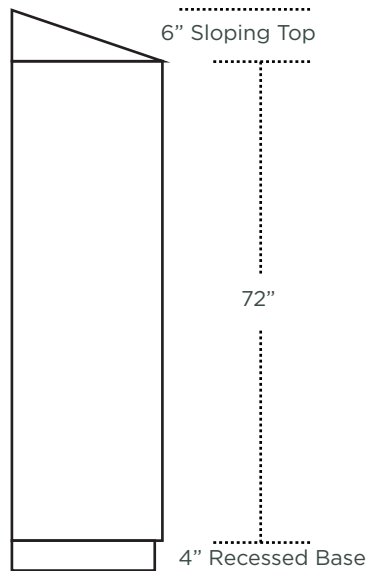

Single Tier Lockers include one hat shelf and three coat hooks. Double Tier & Triple Tier Lockers include two coat hooks per compartment.

Locker Materials:

- Frames 16 ga
- Doors 20 ga
- Shelves 24 ga
- Bodies 24 ga
- Nickel plated coat hooks
- Aluminum recessed padlock

Standard Locker Dimensions

Width	Depth	Height
12"	12"	72"
304.80mm	304.80mm	1828.80mm
12"	15"	72"
304.80mm	381.00mm	1828.80mm
12"	18"	72"
304.80mm	457.20mm	1828.80mm
15"	15"	72"
381.00mm	381.00mm	1828.80mm
15"	18"	72"
381.00mm	457.20mm	1828.80mm
18"	18"	72"
457.20mm	457.20mm	1828.80mm

Available Options:

- Slipping tops (Helps eliminate dust build up)
- Recessed base (Prevents fluid from entering lockers)
- Number plates
- Coat rods
- Cylinder locks
- Coin operated locks
- Galvanized construction

Personal Constable Lockers

Extra security and drawer storage lockers

Designed with police, army, emergency, correctional, military, special forces and federal, provincial and municipal employees in mind, these lockers have special features built in. Each locker features double pan doors, lockable gun drawers and a recessed base.

Lockable gun drawer and Coat Bar

An interior lockable gun drawer provides extra security, while hooks inside as well as on the door and a coat bar make it easier to hang and organize additional equipment and clothing.

Standard Features:

- Double pan doors
- Lockable gun drawer
- Coat bars and hooks
- Recessed base
- Fully assembled
- 16 Colour choices

Optional Features

- Sloping tops
- Boot shelves
- Mesh doors
- Built-in locks
- Custom sizes
- Mononock stick holder
- Lower storage drawers

Lower drawer storage

With optional lower drawer storage, these lockers can keep footwear separate for better ventilation, drying and reduced odor. Ideal to keep uniforms clean and dry. The drawers also create an ideal platform for sitting or changing to save space and streamline any locker room.

Available in These Sizes:

Widths: 18", 24"
Depths: 18", 21", 24"
Height: 76"

Customizable features and sizes to meet your needs

Our constable lockers come solidly built no matter how you need to customized them for your needs. Mesh doors help with aerating clothing and equipment to help keep them dry and ready for use. Contact Swiss Instruments with your needs so that we can work with you to get the locker that's perfect for your needs.

Mining Locker Series

The perfect heavy duty industrial locker

These lockers have been specifically designed for the mining, forestry, petroleum, chemical manufacturing and other heavy industries. Built with heavy duty catches, double vented doors, personal effects shelf, a boot rack, maple wood bench and an easy clean bottom sweep out, these lockers are perfect for industries where equipment, and clothing tend to get wet and dirty.

Personal effects shelf & vented doors

The personal effects shelf is vented as well as providing a separate clean area to store personal effects from dirty, muddy or wet uniforms and gear. The vented doors help with odor and drying of clothes and help keep the locker room a tidy place.

Handles

All handles are manufactured from extruded aluminum and finished with a clear anodized coating for long lasting durability.

Heavy duty shelving

The shelves are formed from 18 ga cold rolled steel and flanged on all sides with a u-channel flange on the front of extra rigidity and support. The shelves can optionally be perforated for additional ventilation.

Standard Features:

- Double pan doors
- Coat hooks
- Fully assembled
- 16 colour choices
- Vented body and doors
- Easy clean bottom sweep out

Optional Features

- Sloping tops
- Mesh doors
- Built-in locks
- Custom sizes
- Coat bars
- Custom ventilation

Available in These Sizes:

Widths: 15", 18", 24"

Depths: 18", 21", 24"

Height: 84", 90"

Boot rack and Maple Wood Bench

A convenient boot rack is perfect for hanging wet boots out to dry for the next work day. The maple wood bench is a nice touch and provides additional room for changing. There is also an easy clean bottom that makes it easy to sweep out dirt, mud and whatever else settles to the bottom of the locker.

Institutional Locker Series

Perfect for small to large institutions

Designed with schools, hospitals, emergency services and correctional institutions in mind our institutional locker series provides all the basic features needed in a locker while offering options to customize them to your specific needs.

Standard Features:

Door

- 16 ga outer reinforced with welded 16 ga full length z-channel
- Double pan construction
- Comes with 2 mechanically fastened bumpers

Door Frame:

- 16 ga frame resistance welded on all corners and formed to provide 3 sided full length door strike

Body:

- 20 ga shelf reinforced by a welded hat channel under front edge
- 16 ga galvanized bottom reinforced with welded 16 ga hat channel painted
- 24 ga top, back and sides - polyester prepaint steel

Hardware:

- 16 ga full length piano hinge welded to frame
- Heavy duty 1/4" wire chrome plated coat hooks
- Anodized aluminum handle

Paint Finish:

- All parts are treated with an Iron-phosphate multi-stage process
- All parts receive a high quality powder coat finish

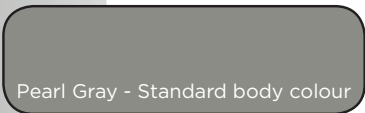

Optional Features:

- Sloping tops
- Recessed base
- Number plates (plastic engraved)
- Custom colours
- Coat rods
- Cylinder locks
- Coin operated locks
- Galvanized construction
- Double hook under shelf
- Heavier gauge body panels
